## Abstract

The abstract should summarize the paper in 150–250 words. ECCV follows the Springer LNCS single-column format with a 14-page limit excluding references.

**Keywords:** Computer Vision, Machine Learning, ECCV

## 1 Introduction

ECCV (European Conference on Computer Vision) is a premier venue for computer vision research, held biennially. This template provides a starting point for ECCV 2026 submissions.

## 2 CVPR-to-ECCV Migration

Authors re-submitting from CVPR should note that ECCV uses a single-column format. Figures previously designed for two-column layouts may need rescaling.

## 3 Method

Describe your proposed approach with mathematical formulation:

$$f(x) = \text{softmax}(W_2 \cdot \text{ReLU}(W_1x + b_1) + b_2)$$

## 4 Experiments

Present experimental results with proper baselines:

Table 1: Comparison with state-of-the-art methods.

Method	mAP	FPS
Baseline	45.2	30
Prior Work	48.7	25
Ours	<b>52.3</b>	28

## **5 Conclusion**

Summarize contributions and future directions.
